

Viscolas® is the only viscoelastic polymer expressly formulated for orthopedic applications. Reproducing the shock attenuating properties of the fatty pads on the bottom of the foot, Viscolas® effectively dissipates the skeletal shock and reverberations that occur with each step, and equalizes underfoot pressures. Use of Viscolas® has proven to speed post-operative recovery of the foot, leg, and lower-back; reduces symptoms of heel strike injuries such as tendinitis and shin splints; and provides effective soft tissue cushioning under the foot. In trial after trial, Viscolas® has been proven to provide significantly better shock absorbing efficiency than any other viscoelastic polymer. Insoles made of Viscolas® are the ones most prescribed by orthopedic surgeons, therapists, and other health professionals... and they are the insoles most chosen for personal use by the staffs of orthopedic facilities.

Soft Point® Viscolas® Heel Pads

MODEL: F21

This low profile pad is ideal for most shoe types. It is extremely easy and comfortable to wear. Natural tacky surface to keep heel pad in place, covered with super-soft, ultra-absorbent, abrasion-resistant suede fabric to keep the foot dry and comfortable.

- Indicated for:
- Heel Pain
 - Fat Pad Atrophy
 - Leg Length Discrepancies

Soft Point® Full Insoles

MODEL: F15

The blue inserts in the Full Insoles have a softer durometer profile in the heel and metatarsal area for enhanced comfort. The positioning of the blue inserts helps relieve pressure and pain on the most sensitive areas of the foot – the heel and the metatarsal area. The shape of the Full Insole gives slight arch support and has a tapered, lower profile at the toes for an improved fit.

ORDER #	SIZE	MEN'S SHOE SIZE	WOMEN'S SHOE SIZE

Soft Point® ¾ Insoles

MODEL: F14

The blue inserts in the ¾ Insoles have a softer durometer profile in the heel and metatarsal area for enhanced comfort. The positioning of the softer, blue inserts helps relieve pressure and pain on the most sensitive areas of the foot – the heel and the metatarsal. The shape of the ¾ Insole gives additional arch support and heel stabilization.

Soft Point® Heel Cushions

MODEL: F13

The blue spot in the Heel Cushion has a softer durometer profile at the heel for enhanced comfort. The shape of the cushion and the medial position of the soft, blue spot help relieve pressure and pain on the most sensitive area of the plantar fascia.

ORDER #	SIZE	MEN'S SHOE SIZE	WOMEN'S SHOE SIZE
F131	Small	3 ½ - 7 ½	5 - 8
F133	Large	8 - 13	8 ½ & up

SOFT POINT® Footcare Products are made of medical grade silicone for long lasting support and comfort. Silicone gives optimal absorption of the shock generated from everyday and high-impact heel strike. The impact and force on the heel, joints and back are thereby reduced helping to relieve pain and discomfort. Non-irritating and odor free, silicone will always remain soft and retain its shape.

Many of the SOFT POINT® Footcare Products have blue inserts which have a softer durometer profile for enhanced comfort. The blue inserts are scientifically placed to help relieve pressure and pain on the most sensitive areas of the foot.

For Men & Women

Deluxe Leather Orthotic Insoles by SOFT POINT®

MODEL: F35

Indicated for Plantar or Arch Pain, Heel Pain/Spurs, Arch Support, Forefoot Pain and Calluses, Shin Splints, Post-Operative Conditions, Lower Back, Leg and Foot Pain and Fatigue

The Deluxe Leather Orthotic Insoles combine the comfort of premium leather and high-density cushioning foam with semi-rigid arch support and motion control. Unique tri-layer design has many features to help relieve and prevent common foot problems. Leather is an excellent footcare material because it is cool, soft and conforming, and helps prevent blisters and calluses.

- Fine leather top cover
- Cool and breathable
- Superior cushioning with rigid arch support
- Gel heel pad and movable metatarsal pad
- Easy to wear and move from shoe-to-shoe
- Trim line to size

PressureLite® Moldable Diabetic Insoles

MODEL: F45

Dual-layer design provides relief to insensitive feet. The natural heat and pressure of the foot molds the top layer for a conforming fit and the bottom layer is supportive and absorbs shock. Insole can be trimmed to fit any shoe. Can also be heat set.

- Deep cupped heel for increased heel stabilization
- Moderate longitudinal arch support
- Dual layer designed to relieve insensitive feet
- Easy to trim and fit in most diabetic shoes
