

ProLite® Knitted Pullover Knee Support

MODEL: 37-400

This elastic support provides excellent compression and stabilization for weak or injured knees. Made of a stretch knitted elastic that is a lightweight and breathable alternative to neoprene. Elastic provides compressive support while maintaining flexibility. Colors: Blue and Beige.

COMPUTERIZED CONTROLLED KNITTING - Compression where needed to speed healing and reduce joint pain.

- **Stretch Top and Bottom Bands** - Comfortably keep the support in place without constricting or digging into skin.
- **Contoured Shape** - Provides more precise compression and fit.
- **Knit Design** - Unique design lays more stretch yarns where greater flexibility is desired and less where not needed. The result is increased comfort and fit with precise compression. Design relieves pressure on tender joint while providing compression to stabilize the soft tissues and promote circulation.
