Wrist Support Knitted Pullover

Latex Free

MODEL: 22-400

This support provides excellent compression and stabilization for weak or injured wrists. Made of a stretch knitted Lycra/nylon material that makes a lightweight and breathable alternative to neoprene. Lycra provides compressive support while maintaining flexibility. Colors: Blue or Beige.

Measure around center of wrist.

Neoprene Wrist Wrap

MODEL: 22-109

Neoprene wrist wrap with adjustable closure fits a wide range of sizes and fits right or left wrist. Provides lightweight support and soothing warmth to aching, fatigued or weak wrists. Made of lightweight neoprene with a soft nylon loop lining. Universal size. Color: Navy.

WorkAbout® CarpalMate® Wrist Support

MODEL: 22-140

CarpalMate® is a lightweight wrist support designed to maintain the wrist in a neutral position while allowing full finger dexterity. The molded portion of the support extends from the distal forearm to just past the wrist and sits comfortably between the Thenar and Hypothenar Eminences (fatty pads of the palm). This design prevents the wrist from dropping and prevents excess thumb and little finger opposition. Controlling these motions will prevent excess flexion of the wrist and finger flexor tendons thus avoiding overuse. Overuse can cause tendon inflammation which causes pressure on the Median Nerve and is the cause of Carpal Tunnel Syndrome. The support is held in place by a wide elastic strap that provides comfortable compressive support at the wrist. Colors: Black or Beige.

CarpalMate® is ideal for activities that require repetitive stressful motions such as:

- Typing
- Data Entry
- Small Parts Assembly

Fits right or left.

Low Profile ProLite® 6" Wrist Splint

MODEL: 22-470

Provides stabilization and compression to weak or injured wrists. Ideal for sprains, strains, Carpal Tunnel Syndrome and after cast removal. Removable palmar stay and two medial/lateral stays provide maximum support and stabilization, holding the wrist in a neutral position. Ideal for latex sensitive people.

Made of an open cell foam with interlock polyester cover for a cool, breathable alternative to neoprene. Material provides comfortable, continuous compression. Low contour at the palmar crease allows for full finger dexterity and improved grip strength. Breathable spandex insert ensures a proper fit and easy application every time. Low profile and shorter 6" length for less bulk and comfortable all-day wear. Color: Black (helps hide soiling).

Measure around the center of the wrist. Specify right or left.

Soft Fit Suede Finish Cock-Up Wrist Brace

MODEL: 22-150/151

Made of comfortable, perforated suede finish material with a soft, padded liner that absorbs moisture. Brace has a metal palmar stay that is orthopedically designed to hold the wrist in the neutral, "cock-up" position and prevents flexion. Two metal dorsal stays on the back of the brace help prevent extension. Recommended to support weak or injured wrists, treat wrist strains, slight to moderate wrist sprains, Carpal Tunnel Syndrome, or after cast removal. Easy, one-hand lace-pull closure system. Colors: Beige or Black.

ProLite® 8" Wrist Splint

MODEL: 22-450

Best Fitting Splint Available!

Provides immobilization for weak or injured wrists.

Ideal for sprains, strains or after cast removal. Made of a cool and breathable open cell foam material with interlock poly cover. Material also provides comfortable, continuous compression. Low contour at palmar crease allows for full finger dexterity and improved grip strength. Removable palmar stay and two medial/lateral stays provide maximum support and immobilization. Loop lock closures and elastic insert assure proper fit and easy one hand application. Black color helps hide soiling. Specify right or left.

ProLite® Compression-Formed Composite Wrist Splint with Abducted Thumb

MODEL: 22-460

Recommended when immobilization of the wrist and/or thumb is needed.

Semi-rigid Thumb Spica portion is contoured to provide intimate support, immobilization and thumb abduction. The unique design of the foam spica protects the thumb from impact or shock without any uncomfortable binding or stitch seams. The splint has a metal palmar and a dorsal stay to prevent flexion and extension. Recommended for post-surgical treatment of wrist and thumb injuries. Especially for treatment of Basal Joint Arthritis, DeQuervain's Tenosynovitis, tendinitis, accumulative trauma disorders of the thumb and wrist, severe wrist sprains, strains/sprains of the thumb joint (MCP), advanced Carpal Tunnel Syndrome, or after cast removal. Color: Black. Specify right or left.
