ARTHRITIS PAIN RELIEF

TOPICAL ANALGESIC CREAM • 0.075% PURIFIED CAPSAICIN

Net Wt. 1.5 oz. (43g)

Drug Facts**Active Ingredient:**

Capsaicin oleoresin (0.075% Capsaicin)

Purpose:

Topical Analgesic

Uses: For the temporary relief of minor aches and pains of joints and muscles associated with arthritis, simple backache, and strains.**Warnings:***For external use only. Use only as directed.***When using this product** • You may experience a burning sensation, which is normal and related to the way the product works. With regular use, this sensation generally disappears within several days • Avoid contact with eyes or mucous membranes - if this occurs, rinse the affected area thoroughly with water • Do not bandage tightly, apply to wounds or damaged skin or use with a heating pad. • Do not apply immediately before or after activities, such as bathing, swimming, sun bathing, or heavy exercise.**Stop use and ask a doctor if:** • condition worsens • symptoms persist for more than 7 days or clear up and occur again within a few days • skin irritation or blistering occurs.**If pregnant or breast-feeding, ask a health professional before use.****Keep out of reach of children.** In case of accidental ingestion, get medical help or contact a Poison Control Center right away.**Directions:** Adults and children over 18 years of age. Apply to affected area not more than 3 to 4 times a day. Massage into painful area until absorbed into skin. **WASH HANDS WITH SOAP AND WATER AFTER APPLYING.** Best results typically occur after 2 to 4 weeks of continued use.**Other Information:** Store at controlled room temperature 15°- 30°C (59°-86°F). Close cap tightly after use.**Active Ingredients:** Cetyl Alcohol, Diazolidinyl Urea, Fragrance, Glyceryl Monostearate, Iodopropynyl Butylcarbamate, PEG 8, Petrolatum, Plysorbate 80, Propylene Glycol, Sorbitol, Titanium Dioxide, Purified Water.**WHAT IS CAPSAICIN?** Capsaicin is a natural substance that gives chili peppers their spicy fire. When used in topical creams, Capsaicin gives a feeling of warmth on the skin and surrounding area. However, the real benefit is that Capsaicin works past surface pain to the molecular level. Capsaicin relieves pain by blocking the transmission of a pain-relaying substance called Substance P to the brain. Capsaicin cream produces a temporary reduction in pain, so it must be used regularly to provide prolonged pain relief. Best results typically occur after 2 to 4 weeks of continuous use.
