

LATERAL KNEE STABILIZER with "J" Shaped Buttress

Model No: 37-250

Sizes: XSmall - 3XLarge

Color: Black

The Safe-T-Sport® Lateral Knee Stabilizer with "J" Shaped Buttress provides excellent side-to-side support of the knee and stabilization of the kneecap. Indicated for conditions such as: Chondromalacia, pain from lateral pressure syndrome, patella instabilities, lateral patellofemoral malalignment, and lateral dislocation.

Sports Neoprene

Neoprene has soft, long loop nylon lining for comfortable wear. Durable enough for wear during sports. Sports neoprene is an ideal material because it provides consistent compression and four-way stretch for proper fit and comfort. It retains the body's natural heat to provide therapeutic and soothing warmth to joints and muscles.

Tubular "J" Buttress

Maintains proper alignment of the patella (kneecap). Provides lateral side support and stabilization.

Adjustable Support Straps

Straps adjust medially for an adjustable amount of compression and increased stability. The unique angle of the straps creates extra support compression across the lateral "J" buttress for increased stabilization.

Flexible Stays

Spiral stays provide medial and lateral stability while maintaining full range of motion.

Seamless Feel

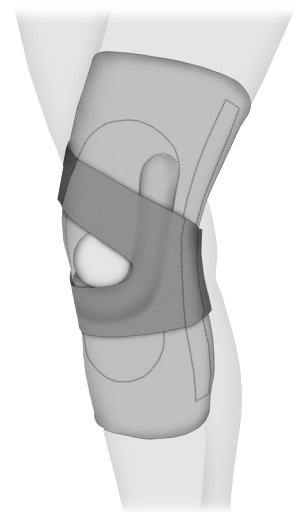

Unique low profile backstitch is extremely strong and durable without the need for seaming tape or adhesive – for a non-irritating feel.

Tapered Sleeve Design

The contoured neoprene sleeve design accommodates curvature of the leg. The brace fits comfortably and is less likely to migrate.

Low Profile, Slip-on Style

Easy to apply and remove, comfortable to wear.

Size	Fits Thigh
XSmall	12 - 13"
Small	14 - 15"
Medium	16 - 17"
Large	18 - 19"
XLarge	20 - 21"
XXLarge	22 - 23"
3XLarge	24 - 25"

Measure four inches above the center of the kneecap. Specify right or left.
